

# Picture Storage

As part of our Hydrawise features, you get a set allowance for data. That way, you can upload personalized photos for your zones, file sheets, and other data for your customers if you are a contractor.

The table below shows the data allowance based on your plan:

| Home Plans  | Capacity |
|---|----------|
| Free (Home Plan & Personal Weather Station Plans) | 25 MB    |
| Enthusiast Plan                                   | 100 MB   |

| Contractor Plans                | Capacity |
|---------------------------------|----------|
| Contractor Starter Plans (Free) | 25 MB    |
| Contractor Plan                 | 100 MB   |
| Bronze Plan                     | 100 MB   |
| Silver Plan                     | 150 MB   |
| Gold Plan                       | 200 MB   |

Auto resize is also available. This automatically reduces the file size of image uploads based on the following conditions:

1. If the file size is greater than 1.5 MB, we reduce image size to 2000 pixels.
2. All other files are converted to JPG.
