

# Why does it say "Not Scheduled" when I click on my zone?

From time to time when you click on your zones from your Dashboard, you may see "Not Scheduled" next to "Next Run."

If you know you have a schedule set and that everything has been set up correctly, all you need to do is refresh your page or click on something that brings you away from the Dashboard. Then, return to the Dashboard. You will see that your schedule now shows the "Next Run."

Sometimes this occurs because of a delay with the schedule updating on your Dashboard. Refreshing allows the system to update.
