

Offline Adjustments - Watering with no Internet

If your controller loses internet connectivity for more than one day, we'll send you an email notification. During this time, your controller will run the last synced schedule in offline mode.

Offline watering adjustments apply when your controller is not connected to the internet after 30 minutes.

You can access this setting from the **Controller Settings** tab on your home dashboard.

□

In offline mode, the controller will set watering times based on watering adjustments set up beforehand.

If the next irrigation event for a zone was scheduled for Saturday, offline mode for that zone would start after the irrigation event on Saturday if the controller didn't have the internet. If there are no irrigation events scheduled in the controller when it loses the internet, offline mode will start **30 minutes** after the controller loses internet.

NOTE: Without internet connectivity, your controller won't be able to automatically modify its watering schedule based on weather forecasts.
