

New App Support

The **Updated Hydrowise App** takes Hunter’s Hydrowise irrigation product line in AI world. The updated app includes many new features and technologies to provide homeowners and contractors with more information about their irrigation systems.

[NEW APP SUPPORT](#) [1]

Overview

The new look and feel provide a similar experience to other Apps on your Apple or Android device. The familiar interface, button, swipe, and operation will make it easier for our customer to understand their irrigation.

Know what happened from the Home Screen. The 3**Home** sections provide you with all the knowledge you need about your irrigation system.

Your Notifications

We’ve added more notifications to provide more information in Your Notifications. What are the most important things you should know, and what actions must you take?

- The controller is not connected.
- Rain is stopping irrigation for all zones.
- The serial number is missing. Your controller is not watering.
- The Weather Station XXXXX is not reporting.
- Provide summary information.
 - 14 hours and 47 minutes of watering over 7 days, 47% less than normal.
 - The flowmeter has measured 4,500 gallons (liters) in the last 7 days.

Your Zones

Your Zones provides information about each section of your system, including zone name, number, and picture of the area, and just by tapping a zone picture or icon, you can view

- Watering Durations and why it is adjusted.
- Flow
- Electrical Current

Forecast & Observations

- Forecast & Observations is where we will show you all your weather information. Providing a forecast for today and the next six days using highly accurate, internet-sourced local weather data. Our advanced Observations use real weather stations or our preferred Virtual Weather Station to provide a history of weather at your location.
- Understand the weather, both past and forecasts

A summary of what’s new in the App.

New and updated Wizard to fast-track controller and App setup.

New simple menu structure

New **Reports** with an overview summary
