

Can I have multiple controllers per account?

Yes. Each [plan](#) ^[1] has a limit on the maximum number of controllers permitted per account.

Homeowner & End User Plans

Subscription Plan	Max Controllers
Home Plan	3
Enthusiast Plan	5

Contractor Plans

Subscription Plan	Max Manageable Controllers
Contractor Starter	25
Contractor	75
Bronze	150
Silver	250
Gold	400

Note: As a contractor, the maximum manageable controllers include your own.

For example: If you have five controllers under your Contractor Starter account, you cannot add any more controllers. This means you will be required to upgrade to a Contractor Plan to increase your limit. In addition, if one of your customers has five controllers, this adds to the maximum number of manageable controllers.
