

# Rainfall in my location varies dramatically. How local are your rainfall statistics?

We have approximately 32,000 Hydrawise weather stations around the world, so there is likely one near you.

You can see the weather stations that are near to you [here](#) <sup>[1]</sup>. If you're based in Australia, you can also use one of the Bureau of Meteorology's 807 automated weather stations to control your irrigation schedule.
