

Account - Controller Weather Stations

Setting your location allows your Hydrawise controller to adjust watering based on your local weather conditions.

IMPORTANT: Your weather forecasts and local weather stations are based upon your location so it is important to configure your location correctly in the application.

The chart below has the stations available based on the plan you have on your account.

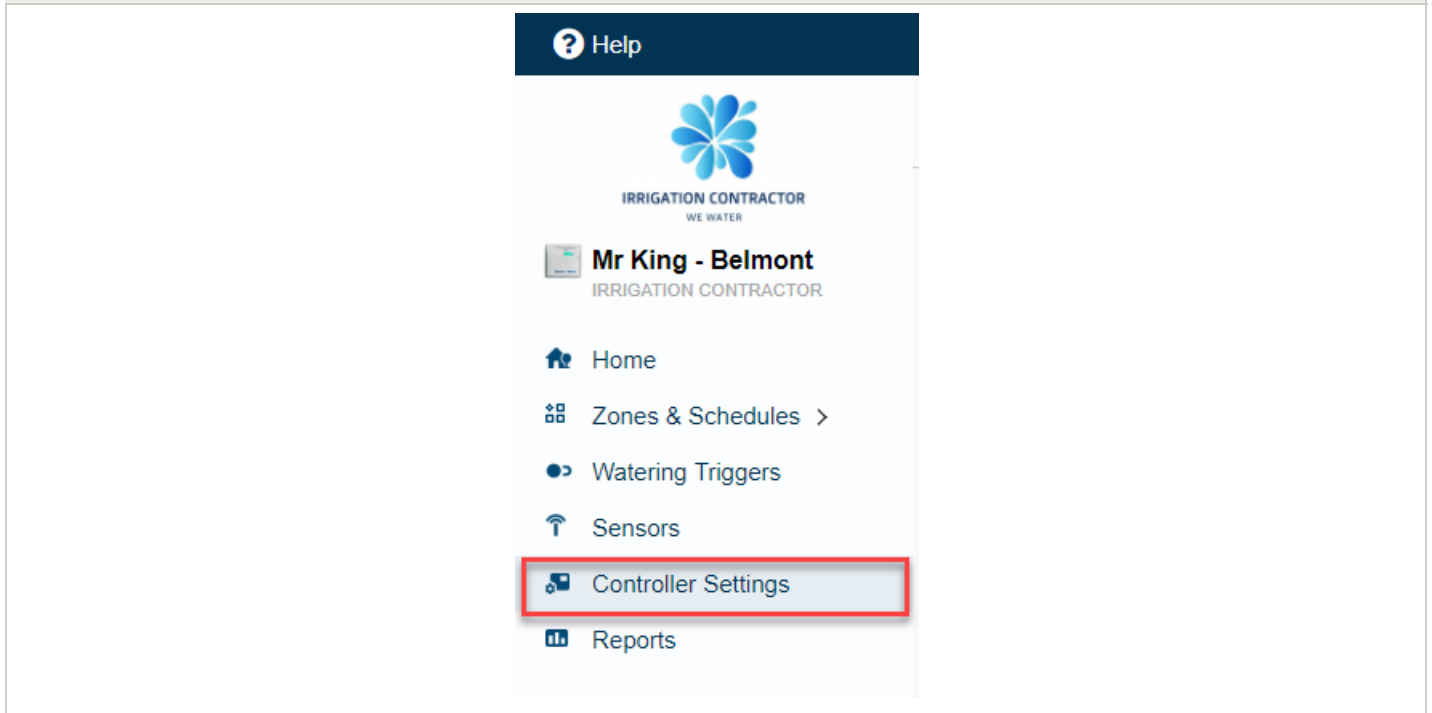

Station Options		
Personal Weather Stations	Up to five can be selected on the Enthusiast plan	<p>Weather Stations</p> <p>Your Enthusiast plan allows you to select up to 5 Weather Stations updated hourly. If you select multiple weather stations then your weather station readings are averaged out to give a higher degree of rainfall accuracy.</p> <div style="text-align: right;"> <p>Closest Station 0.00 mi 1943 Diamond St, San Marcos, CA 92078, USA</p> </div>  <p>27 Stations</p> <ul style="list-style-type: none">  22 Personal Weather Stations ⓘ ☑  4 Free Airport Weather Stations ⓘ ☑  1 Free Virtual Weather Station ⓘ ☑ <p><input type="checkbox"/> Show weather stations not reporting temperature and rainfall</p>
Airport Weather Stations	Up to one can be selected on a free Home Plan	
Virtual Weather Stations	Up to one can be selected on a free Home Plan	

Please view the steps and screenshots to access this feature:

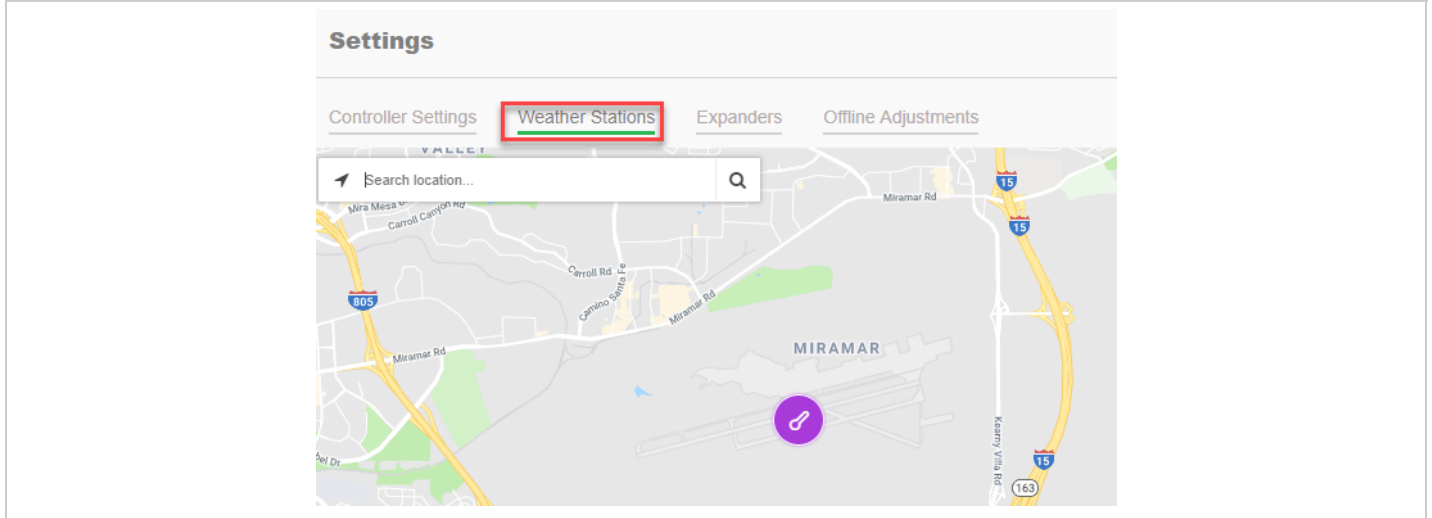

1. From the home menu on the left hand side of the screen, select **Controller Settings**.
2. Select **"Weather stations."**
3. Enter the location of your controller with full street address and click **Click arrow icon** to update.

4. Click on the most relevant weather station(s). To start using a station, press the **Select** button.

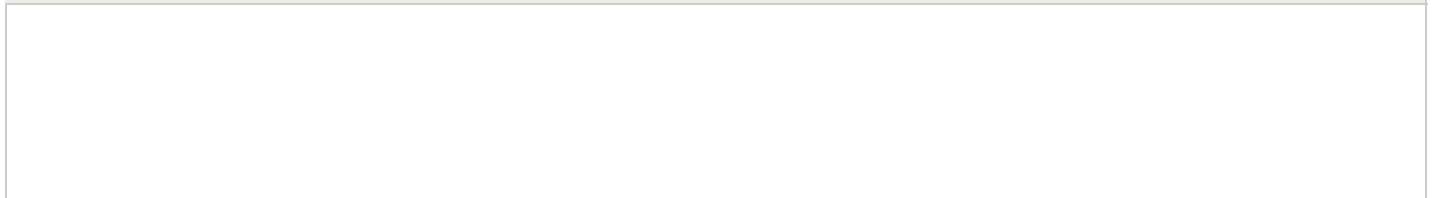

Step 1

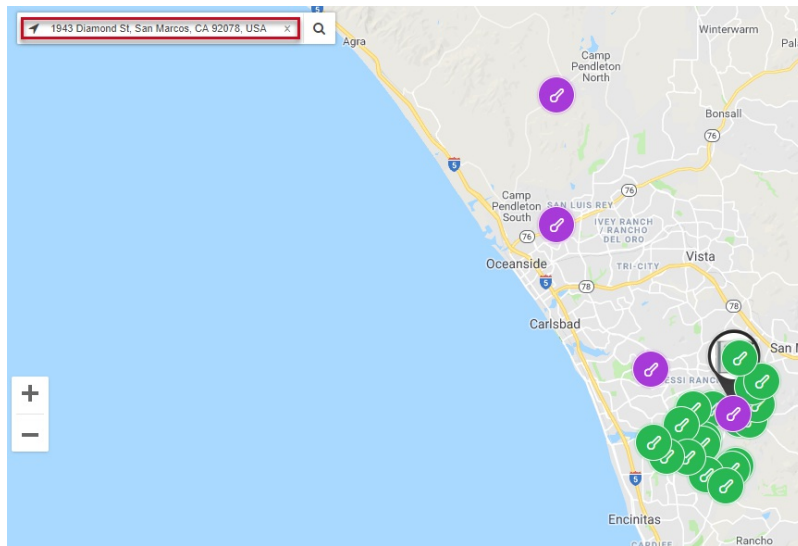

Step 2

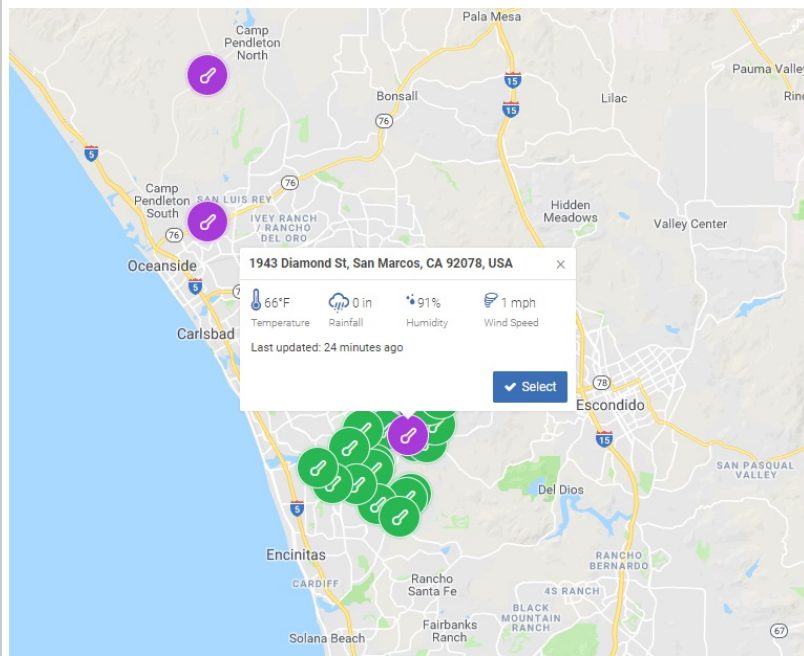

Step 3

Step 4

Information from the weather station(s) is used to determine whether to suspend watering (due to high local rainfall for the day or week) or water more (due to high current temperature).

If you have an [Enthusiast Plan or higher](#) [1], we recommend that you select three or more weather stations in your area to average out abnormalities in individual weather stations.
