

HPC - Upgrading Pro-C

The PRO-C model controller must be the NEWER PC- 400 version (blue buttons and solar sync dial position) with a date code of MARCH 2014 or newer. This date code is written on the white sticker inside the wiring compartment. Ensure you have a strong Wi-Fi signal. Wi-Fi connectivity can be tested on the HPC panel itself (signal strength is shown when you select a wireless network). If you have any issues connecting the controller to the router, please verify all Wi-Fi specifications [here](#) [1].

PC-400 (Blue Buttons) Compatible

PC-300 (Green Buttons) Not Compatible

NOTE: The compatible ribbon design in this panel should have two rows of pins. The single row of pins would also indicate a panel that is *not* compatible.

Remove Pro-C Face Panel

1. Remove ribbon cable with power off.
2. Press down on white hinge release button.
3. Remove face panel.

Install HPC-FP Face Panel

1. Press blue hinges together and attach new HPC panel.
2. Reconnect ribbon cable
3. Close and turn power on

STEPS

For information on complete setup in the application,
please visit our "[How To Guide](#) ^[2]" section.
