

How do I set global pre-configured water schedules?

Contractors now have an option to set pre-configured water schedules for new customers in the customer wide settings.

When a new controller is created (Contractor Portal only), the new controller will automatically get the contractor’s schedule. If you want to have different settings for a specific controller, then they can be changed in the normal way.

Please view the steps to access this feature:

1. Click on the **MANAGER** icon on the upper right hand side, then select **CUSTOMER WIDE SETTINGS**.
2. Click on the **PRE-CONFIGURED WATERING SCHEDULE**.
3. Press the plus button to **ADD WATERING SCHEDULE**.
4. Select the schedule name and watering type then click **OK**.
5. Next, select the watering length, frequency, and adjustments then click **OK**.

Steps 1-4

General > Time Based Schedule

Schedule Name
Assign a name for this new watering schedule

Watering Type

Time Based Schedule
 Smart (ET) Schedule
 Virtual Solar Sync

Water at a specified frequency (eg. every 1 week) and adjust schedule based on temperature and rainfall

Cancel
< Prev
Next >
✔ OK

Step 5

General ▶ **Time Based Schedule**

Watering Length
The number of minutes this zone will run for each time

Enter a number minutes

Watering Frequency
Choose how often each irrigation zone associated with this Watering Schedule will run

Every Program Start Time Interval Based Watering

Weather Adjustments
Adjust watering based on the following triggers

Don't water when:

<input checked="" type="checkbox"/> Forecast below 60°F	<input checked="" type="checkbox"/> 80%+ chance of rain
<input checked="" type="checkbox"/> Wind above 9mph	<input checked="" type="checkbox"/> 0.1in+ rainfall last day
<input checked="" type="checkbox"/> 3in+ rainfall last 7 days	

Adjust watering:

<input checked="" type="checkbox"/> Water 30% less when below 73°F
<input checked="" type="checkbox"/> Water longer when hot
<input type="checkbox"/> Water more often when hot

Cancel

The next time you add or edit a zone, you'll see this preconfigured watering schedule and you can apply it straight away. Your customers will see these preconfigured watering schedules and can apply them to their controllers, but they won't be able to edit or delete as this is only a feature you can access.
