

# Moving Controller

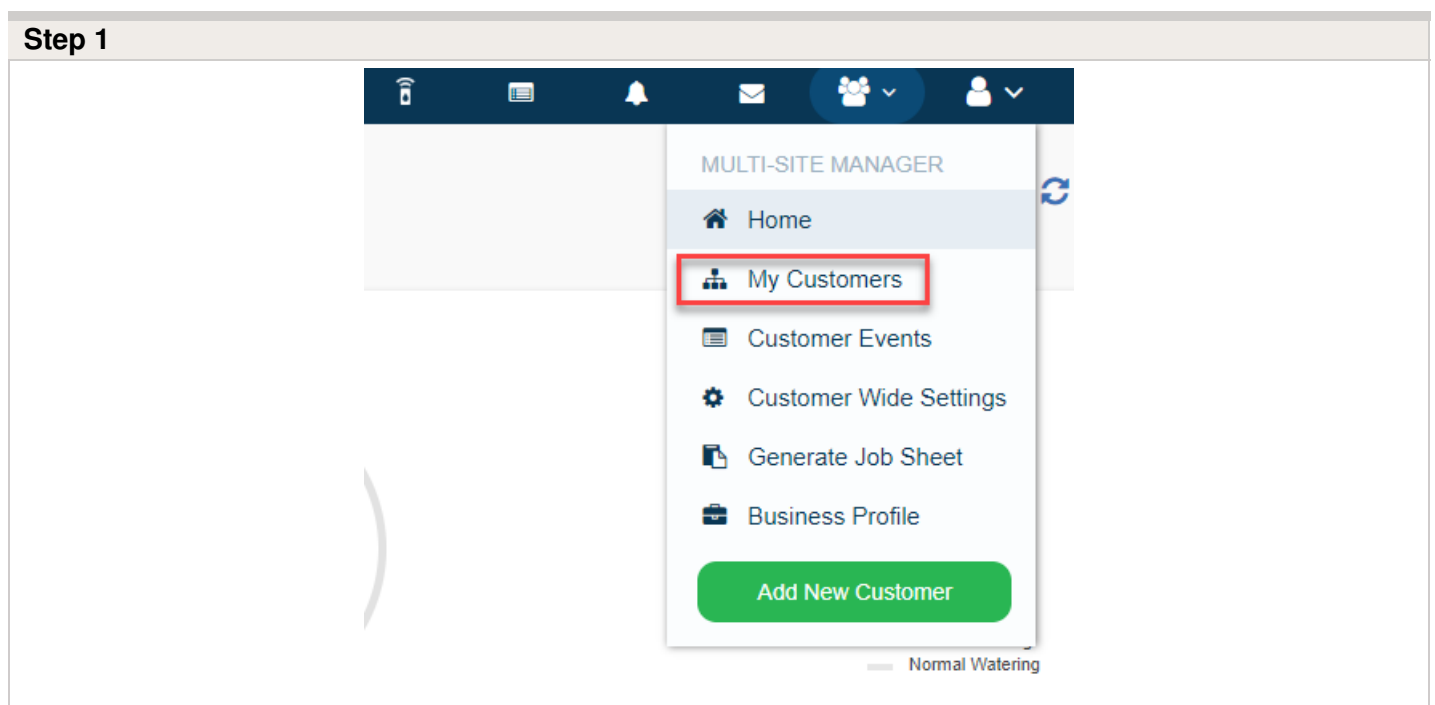

In some cases as the contractor, you may have to add the controller into your personal business account without knowing the customers email address. If this is done, you can move the controller at a later date as long as they are in your account as a customer.

**NOTE:** If your customer is not in your account under **"My Customers"**, then you will need to first add them using the steps in [article found here](#).<sup>[1]</sup>

Please view the steps to access this feature:

1. Click on the **"Manager"** icon on the upper right hand side, then **"My Customers."**
2. Scroll down to my customers section and select the top option to **"Your Account."**
3. Click on the controller name you would like to move and click the **"three dot icon."**
4. Select **"Move to New Account."**
5. Select the account to which you're moving the controller and click **"Move."**

The controller is now assigned to a new account and you both have access.

## Step 2

### My Customers

 Search customers

-  Hydrawise Contractor (your account) 
-  Hunter Industries 
-  Mike Madewell 
-  CEC Building - Hunter 
-  Hunter Hydrawise Software 

## Step 3

### Customer Details

#### Hunter Industries

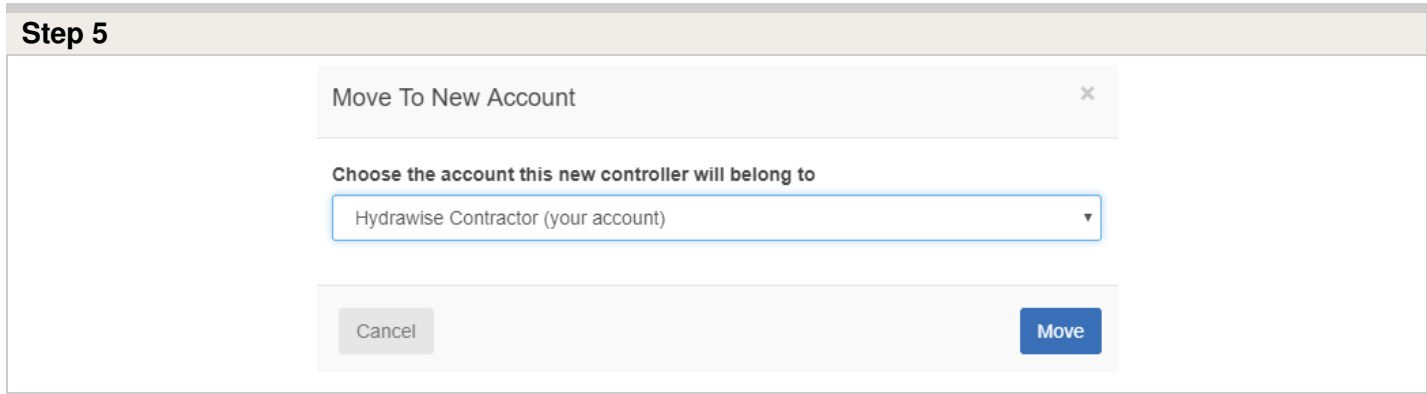

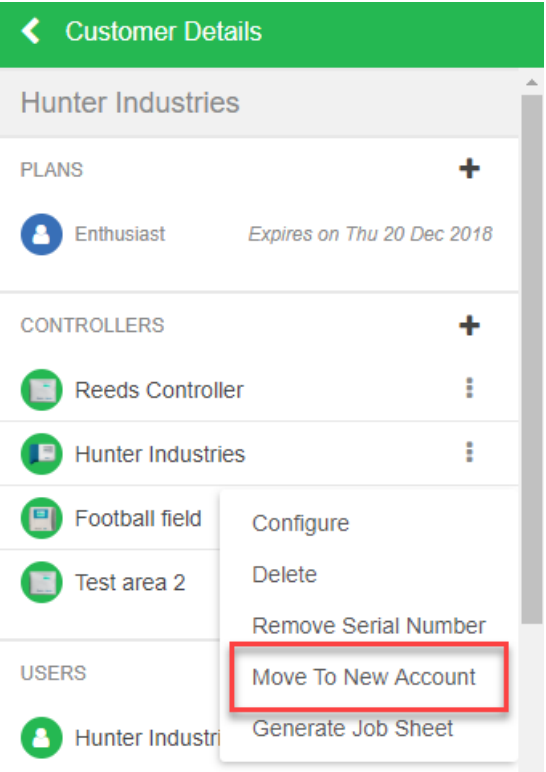

##### PLANS

 Enthusiast *Expires on Thu 20 Dec 2018*

##### CONTROLLERS

-  Reeds Controller 
-  Hunter Industries 
-  Football field 
-  Test area 2 

## Step 4

The controller is now assigned to a new account and you both have access.
