

How do I set global default program start times?

Contractors now have an option to set default start times for new customers in the customer wide settings.

When a new controller is created (Contractor Portal only), the new controller will automatically get the contractor's default Program Start Times. If you want to have different settings for a specific controller, then they can be changed in the normal way.

Please view the steps to access this feature:

1. Click on the **MANAGER** icon on the upper right hand side, then **CUSTOMER WIDE SETTINGS**.
2. Click on the **DEFAULT PROGRAM START TIME**.
3. Press the plus button to **ADD** a new global start time.
4. Select a start time, watering type, and watering days then press **OK**.

It is also possible to re-apply the contractor Program Start Times to one or all of your

customers if they have changed from your settings in the Contractor Portal. When re-applying settings all global (ie. not zone specific) Program Start Times for the controller are replaced with the contractor's Program Start Times.

Please view the steps to access this feature:

1. Click on **RE_APPLY SETTINGS**.
2. Choose all controllers or selected controllers to update the changes and select **OK**.

The screenshot shows a dialog box titled "Re-apply settings" with a close button (X) in the top right corner. Below the title bar, there is a section labeled "Re-apply settings to" with a dropdown menu currently showing "Selected controllers". Below this, a text prompt reads "Please choose the controllers that you want to re-apply the default Watering Triggers to". The main area of the dialog is divided into two panes by a double-headed arrow icon. The left pane, titled "Controllers", contains a list of controller names: "Carioca Court", "PROHC Office", "HPC-FP Office", "1525 Hidden Oaks Lane SE", "Garrison Road", and "10 Savanna Lane". The right pane is currently empty. At the bottom of the dialog, there are two buttons: a grey "Cancel" button on the left and a green "OK" button with a white checkmark on the right.
