

Controller Status

The **CONTROLLER STATUS** feature will allow you to determine the status of your internet connection. The three message options below will display on the home dashboard with an explanation of each status.

Status	Description
All Good	The controller is connected to Hydrowise and has the latest configuration.
No Internet Connection	The controller is not connected to Hydrowise. We detect this within 7 minutes. Learn More [1]
Waiting for Controller	The controller is missing the serial number. Learn More [2]
