

Account - Running Zone(s) Manually

You can run an irrigation zone on demand from from your web browser or from your iPhone/Android app. For running manual from the controller, see article [here](#) [1].

Manual Single Station

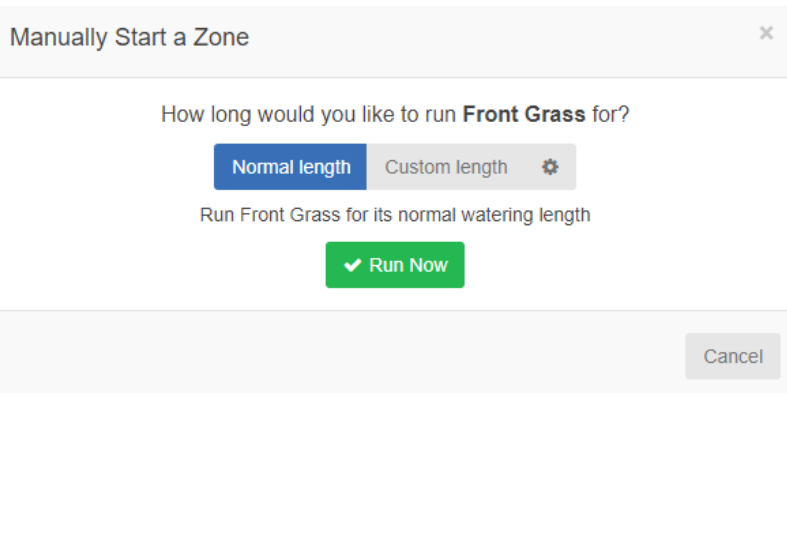

Please view the steps and screenshots to access this feature:

1. From the home dashboard, click on the "zone icon."
2. Select the "play button."
3. Select a "customer length or normal run length."
4. Click "run now."

STEPS 1-2

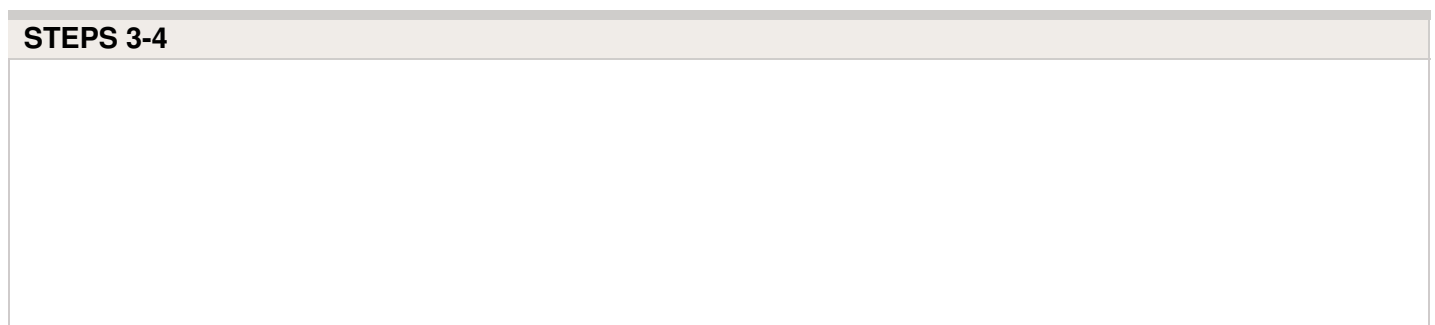

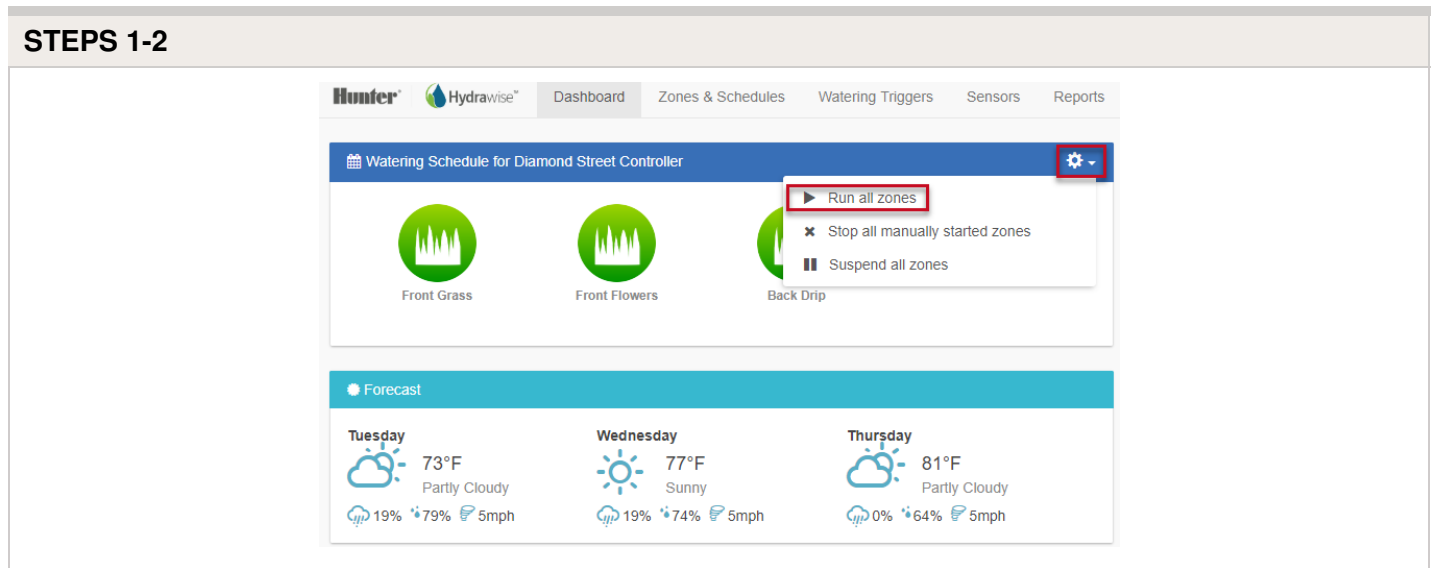

The screenshot shows the 'Watering Schedule for Diamond Street Controller' interface. At the top, there is a blue header with a settings gear icon. Below the header is an information box that says 'Click on any of your zones below to manually change their watering schedules'. There are three zone icons, each with a green play button. The first zone, 'Lowers', has a pop-up window showing 'Next Run: Wed, 26th Sep 5:00am' and 'Length: 5 minutes'. Below this, there is a control panel with a red box around the play button icon, a pause button, and an information icon. Below the zones, there is a weather forecast for Tuesday (73°F, Partly Cloudy), Wednesday (77°F, Sunny), and Thursday (81°F, Partly Cloudy).

STEPS 3-4

Manual All Stations

1. From the home dashboard, click on the "gear with drop down arrow."
2. Select the "run all zones."
3. Select a "customer length or normal run length."
4. Click "run now."
