

PRO-HC - Mounting Controller

INSTALLING THE PRO-HC CONTROLLER

Start by choosing a location with good Wi-Fi coverage. Wi-Fi coverage can be easily tested using a smartphone. A high signal strength is recommended. Wi-Fi connectivity can also be tested on the Pro-HC itself (signal strength is shown when you select a wireless network).

MOUNTING THE CONTROLLER TO A WALL

All necessary hardware is included for most installations.

- 1. Use the hole at the top of the controller as a reference and secure a 1" (25 mm) screw into the wall. **Note:** Install screw anchors when attaching the controller to drywall or masonry wall.
- 2. Align controller with the screw and slide the keyhole on top of the controller over the screw.
- 3. Secure controller in place by installing screws in the other mounting holes.
