How to Add, Edit, and Customize Zones

The **ZONES** section allows you to configure zone names, set zone icons and images, view zone details, set up Cycle & Soak, fine-tune your watering, and configure a master valve if one is installed.

ZONE ICON	DESCRIPTION
□	Use this function to see an overview of when your system will water and for how long.
□	Use this function to make changes to an existing zone like icons, zone names etc.
□	Use this function to add a photo for referencing the zone. See links for details on [mobile](#) [1] and [desktop](#) [2].
□	Use this function to delete the configured zone and all included information.

The steps and screenshots below show how to add, edit, and customize zones.

1. Click on **ZONES & SCHEDULES** from the home Dashboard. Then select **ZONES**.
2. If you have a master valve or pump start relay, select **YES** to enable it. Visit this [section](#) [3] for more configuration details.
3. Select the □ button to add a **NEW** zone. Click the □ icon to edit an existing zone.
4. Choose a **ZONE NAME** (e.g., Front Yard).
5. Choose a **ZONE NUMBER** (e.g., If the front yard is wired to zone one in the controller, select ZONE 1).
6. Choose the **ICON** for your zone. If an image is assigned to zone, that icon will also appear here.
7. Choose whether you want to enable the [CYCLE & SOAK](#) [4] feature.
8. Finally, the **ADVANCED** setting lets you select a **WATERING ADJUSTMENT** as a percentage (e.g., you can set the zone to water 10% less of that run time).
