

# Program Modes - Advanced vs. Standard

Your Hydrawise system can be configured in two separate programming modes: Advanced Mode and Standard Mode.

## Advanced Mode

Use Advanced Mode to create irrigation schedules with Program Start Times and Zone-Based Programs. This mode offers more advanced features than Standard Mode.

Time-Based Schedule	Smart (ET) Schedule	Virtual Solar Sync <sup>®</sup>

## Standard Mode

Standard Mode allows you to create traditional irrigation programs using Programs A, B, and C — just like Hunter X-Core® or Pro-C® controllers. This mode offers less flexibility than Hydrowise Advanced Mode. Key features include:

- Six programs available with six start times each
- Zones already labeled in the program for easier selection
- Once a zone is selected, the zone run time is visible
- Predictive Watering™ options that only apply to that program

Time-Based Schedule	Virtual Solar Sync
