

# How to Change the Run Times using Standard Mode

If you choose to edit the **RUN TIME** for each station (zone) in **STANDARD MODE**, please review the steps and screenshots below to access this feature. For information on changing your run times in **ADVANCED MODE**, please visit the support article [here](#) <sup>[1]</sup>.

The following fields are also available when accessing this feature:

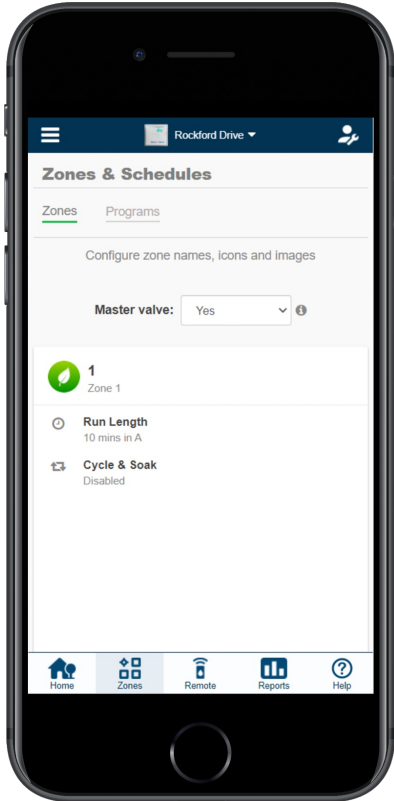

Time and Frequency	
<b>Program Name</b>	Choose the program name and program type.
<b>Start Times</b>	Choose the water days and up to six start times.
<b>Run Times</b>	Choose the number of minutes each zone will run for each start time. Run times must be from 1 min to 23 hrs and 59 mins.
<b>Schedule Adjustment</b>	Choose how to adjust the watering time based on your weather triggers.
<b>Monthly Adjustment</b>	Monthly adjustments can be made using a chart as well. This will allow the run times set in a program to change by month as a global percentage (e.g; June 80%, July 90%, August 100%).

## Edit Run Times

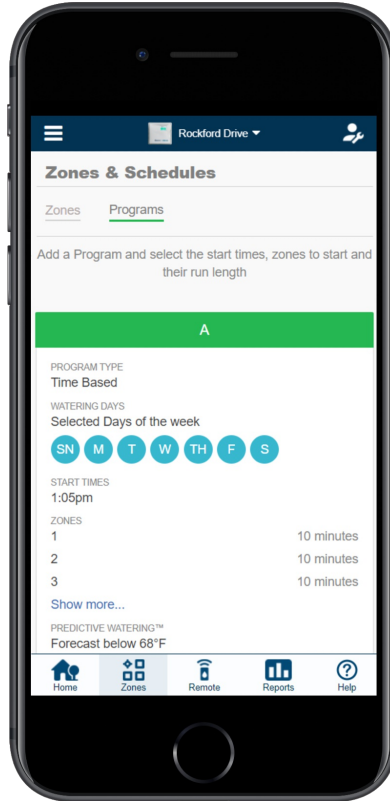

1. Click on **ZONES** at the bottom of the app or **ZONES AND SCHEDULES** on a web browser from the home dashboard.
2. Select **PROGRAMS**.
3. Select the (✎) icon for the program that requires the change.
4. Select **NEXT 2X** in the zone details.
5. Click on **SELECT ALL ZONES** so they appear in the selection bar to the right.

6. Enter the watering **RUN TIME** in minutes for each zone. Select **DONE**, then **OK** to save.
