

How to Change to Advanced Mode

The steps and screenshots below describe how to change the programming mode on your controller:

1. Select **CONTROLLER SETTINGS** from the home Dashboard on the left-hand side.
2. Once the configuration screen has loaded, click the  icon to edit the mode.
3. After you enter the desired mode for your controller, click **"OK."**

For more information on comparing the two different programming modes, click [here](#) ^[1].

Step 1

The screenshot shows the Hunter Hydrawise dashboard interface. At the top, there is a logo for 'IRRIGATION CONTRACTOR WE WATER'. Below the logo, the user is identified as 'Deakin University' with the project name 'SAN DIEGO - LAC - OLD PROJECT'. A vertical navigation menu is on the left side, containing the following items: 'Home', 'Zones & Schedules', 'Watering Triggers', 'Sensors', 'Controller Settings', and 'Reports'. The 'Controller Settings' item is highlighted with a light blue background, and a red arrow points to it from the right.

Step 2

This section is currently empty, intended for a screenshot of the configuration screen.

CONTROLLER

-  **NAME**
Deakin University
-  **SERIAL NUMBER**
virt1112 [Remove Serial](#)
-  **STATUS**
Linked
-  **MODEL**
Pro HC 12 Station Controller
-  **INSTALL DATE**
Wed, 27 Feb 19 17:35:25 +0000 [Start Wizard](#)
-  **SOFTWARE**
-  **PROGRAMMING MODE**
Advanced mode 

Step 3

Edit Controller Settings ✕
